

The new form of industry-academia-government collaboration

Field for **Knowledge** Integration and Innovation

Council of Industry-Academia-Government Collaboration

The Field for Knowledge Integration and Innovation started activities in 2016 for a new Japanese framework with industry-academia collaboration and research across fields while referencing Food Valley in the Netherlands. Based on the three-layer structure of the (1) Council of Industry-Academia-Government Collaboration, (2) R&D Platforms, and (3) Research Consortia, it aims to create innovative products and new businesses at an unprecedented rate.

Currently, over **4,200** members from various fields are participating.

Around 170 platforms are active with a focus on the **5** areas of industry.

36 Smart Agriculture, Forestry, and Fisheries and Smart Food Chains

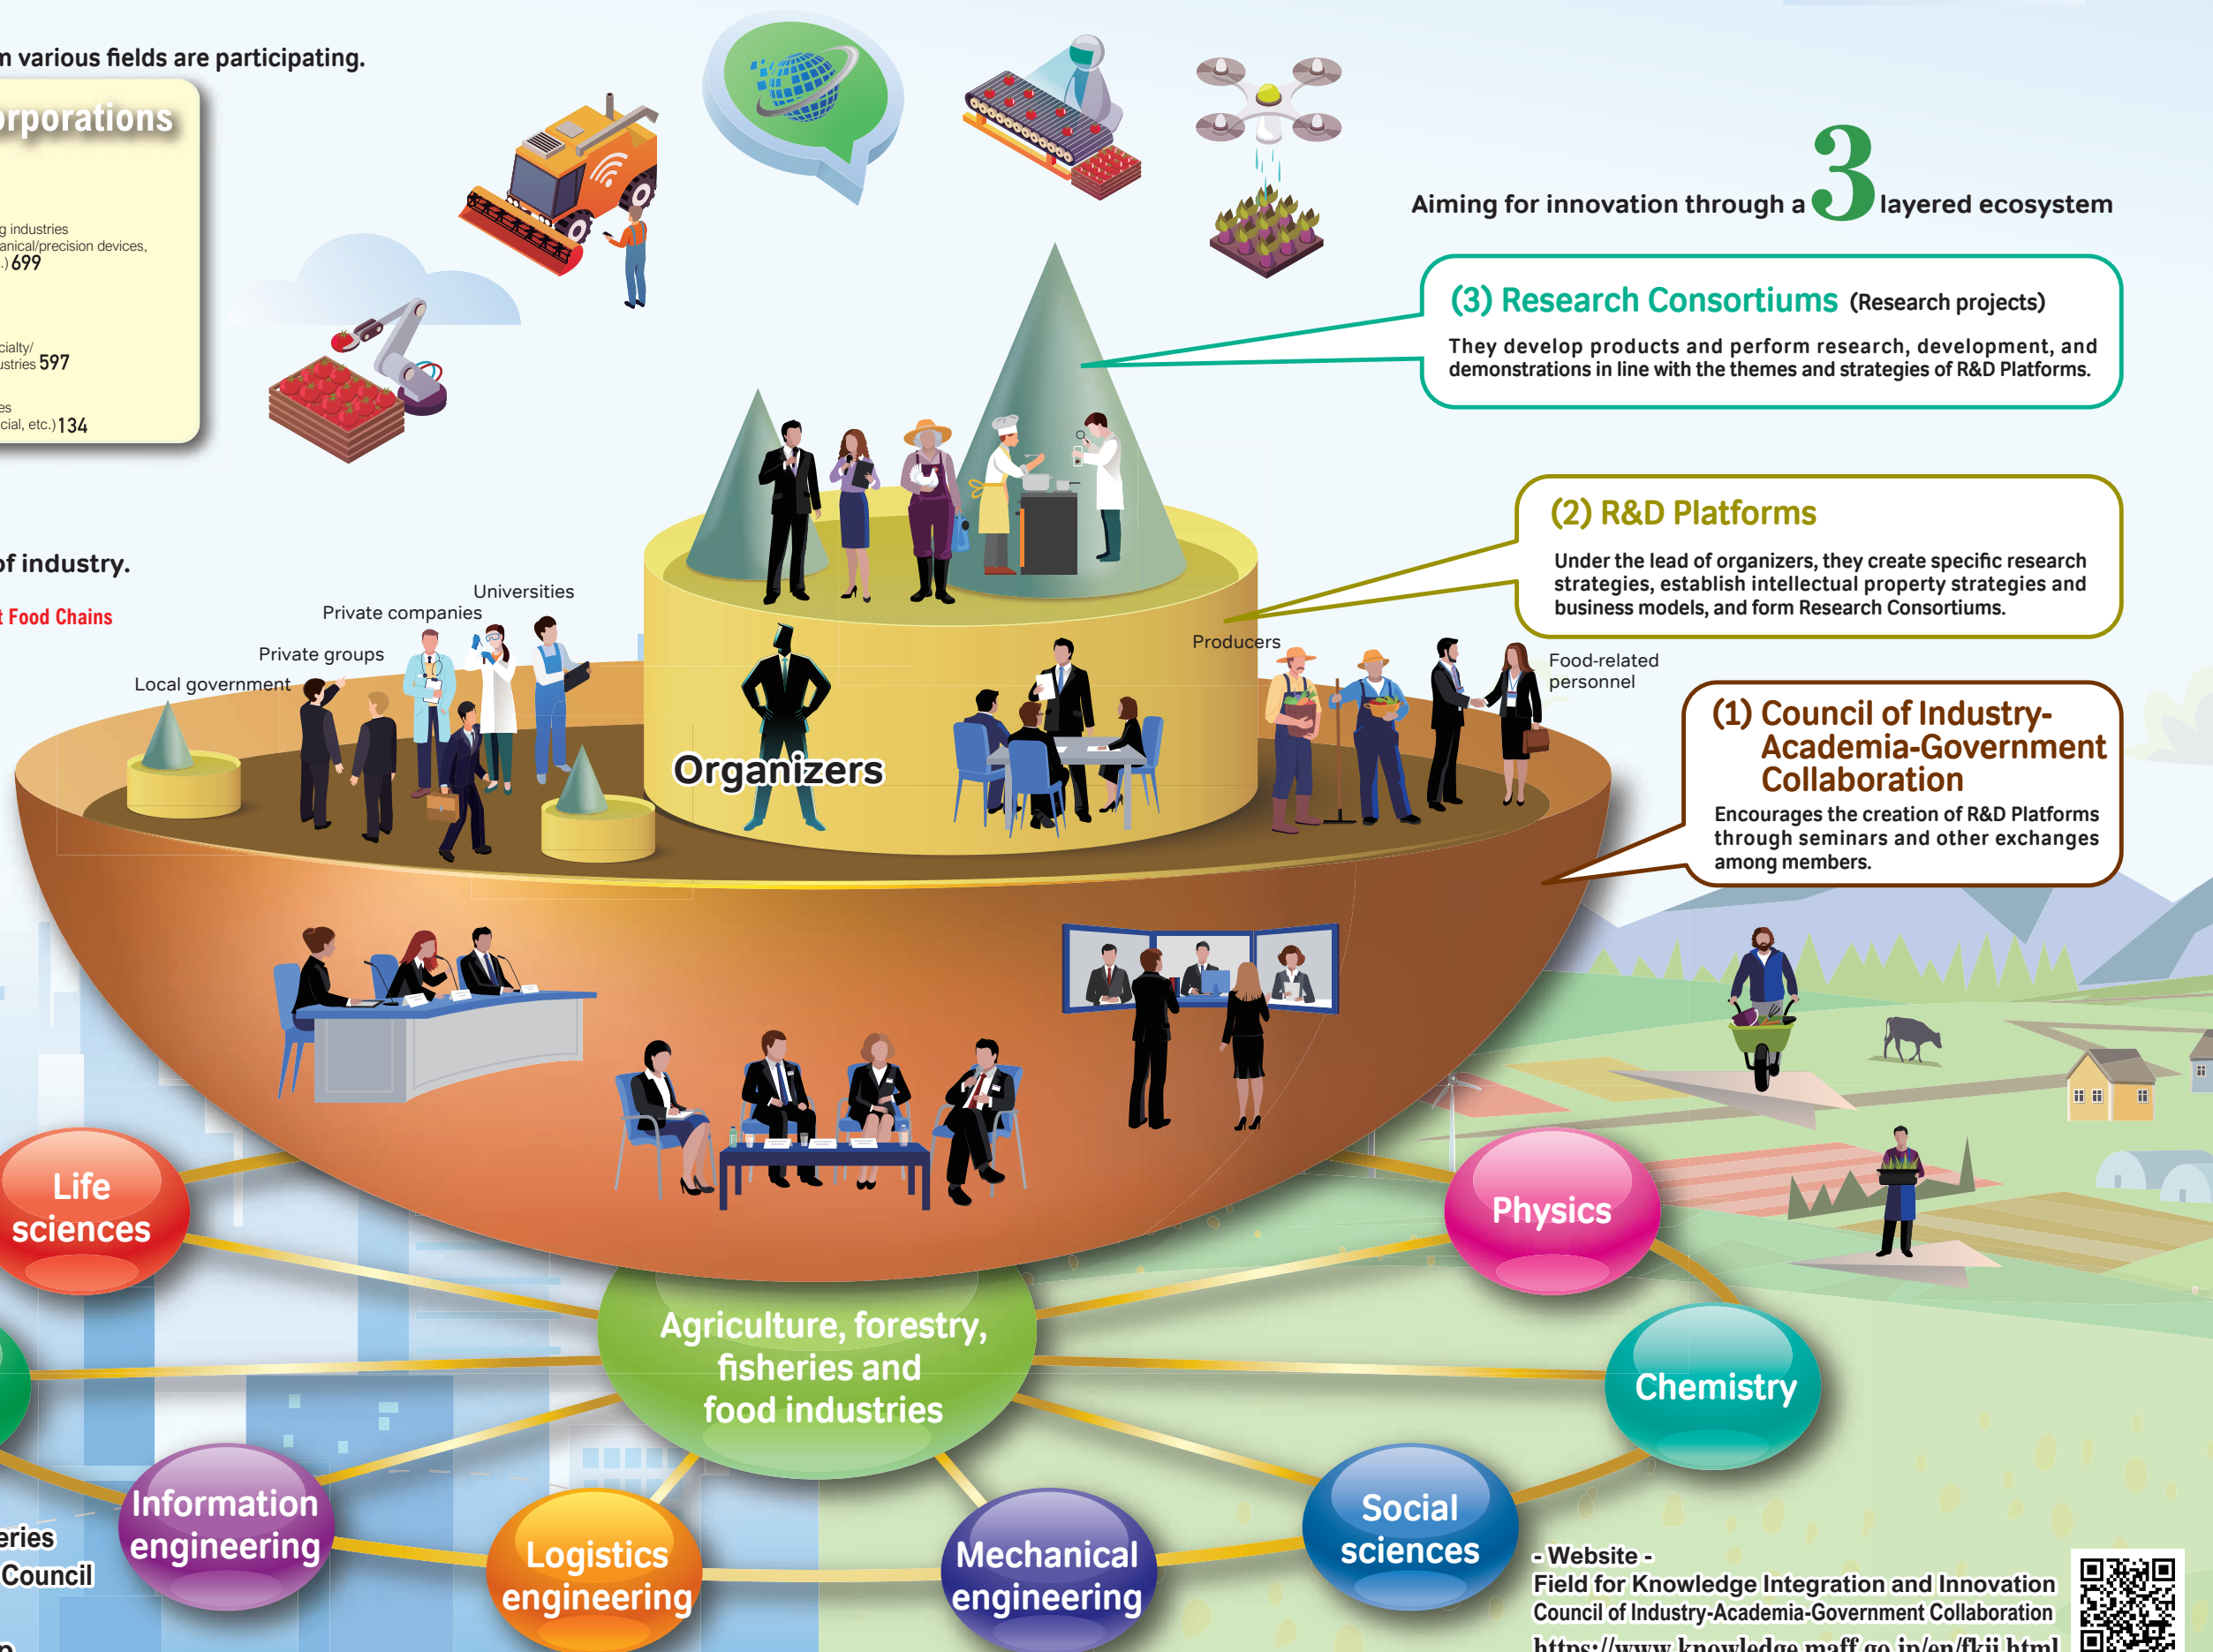

37 Delicious and Healthy Food Development

73 Sustainable Agriculture, Forestry, Fisheries and Food Industries

13 Promoting Export and International Collaboration regarding Agriculture, Forestry, Fishery, and Food Products/Technologies

13 Biotechnology-based Business Creation

Number of platforms (As of February 2022)
